## Emergency Statement Regarding Air, Naval, and Heavy Artillery Attacks

In the ongoing conflicts within the Arakan region and at three locations along its borders with other regions of Myanmar, the fascist terrorist military commission forces are facing significant casualties and defeats, with their units in disarray. Furthermore, their forcibly recruited personnel lack the will to fight, and instances of desertion, defection to our side, and surrender with white flags are occurring daily at both front and rear lines whenever opportunities arise.

In ground battles, the fascist terrorist military commission forces, grappling with heavy losses, have recently intensified attacks in areas of the Arakan region that we fully control and where no fighting is taking place. These attacks target schools, markets, hospitals, clinics, monasteries, and other locations, as well as areas presumed to have gatherings of people, using air, naval, and heavy artillery, striking day and night without discrimination.

Therefore, we urge the public to exercise heightened caution against the fascist terrorist military commission's air, naval, and heavy artillery attacks, more so than before, and to maintain full military awareness at all times. We reiterate this call to remain vigilant.
